

Pradeep SINGH

Systems Engineer

PROFILE SUMMARY

I'm seeking a dynamic Project Manager with a strong technical background to oversee projects involving SQL Server, Moodle, and client management. The ideal candidate will have experience in server monitoring, user authentication, and design tools like Figma, ensuring efficient project execution and client satisfaction. Key Responsibilities: Project Planning & Execution: Lead project planning sessions, define project scope, objectives, and deliverables, ensuring alignment with client requirements. SQL Server Management: Oversee database management tasks, including performance monitoring and optimization, ensuring data integrity and security. Moodle Administration: Manage Moodle implementations, including course creation, user management, and troubleshooting, to enhance learning experiences.
